Have Fun!

## Why Collaborate?

By working together the participants face challenges of making their own ideas work with those of others. This stimulates creativity and improvisational thinking. This process fosters teamwork, patience, and a healthy flexible mindset. It forces even established artists to get out of their comfort zone, and find new solutions to make the project work.

## Collaborative Art Project

Collaborative Art project is a great event, full of fun, learning, and therapeutic benefits. It is ideal for team building, developing respect for the decisions of others, and the practice of accepting contribution from others.

## First Impressions

For our first Collaborative Project, all the visitors who came to the studio, were offered the chance to contribute. The immediate reaction from most people was something like "I don't know what to draw", "I am not good, I can't draw", or "I'll ruin your picture". I explained to them that in this project the only rule was that everything was allowed. This meant that if anyone wanted to draw a big black line across the entire page, it was acceptable to do and everyone would have to honor that decision and adjust to it, incorporating the new element in with whatever idea they had going before.

## First Results

Many people ended up participating and some even came back for days to work on the piece. Some would draw just one object while others would contribute all over. The experiment became a huge success.

### *Project #1 completed over a month*

### *1 hour Project*

## Fun and Therapeutic

It is enough to be a part of just one such project to appreciate the social nature of this event and the kind of therapeutic benefits it produces. In some cases Collaborative Projects can be beneficial in dealing and improving:

Group Dynamics  
Anger Management  
Family Therapy  
Controlling Personality Disorders  
OCD

### *3 day project*
